ABOUT **A**ERO **G**ROUND **T**RAINING

- Aero Ground Training (AGT) is a French & Independent training company for engineers focus on type training courses.
- AGT is approved EASA Part 147.
- Established in 2014, we have international experience for 20 years in maintenance & training.
- AGT HQ is in France, and yet, we have partners worldwide. This allows us to intervene wherever suits you best.
- We offer large scale solutions for Maintenance & Repair Organisation, airlines or independent engineer.

TESTIMONIALS

“A great experience that went beyond our expectations for the level of knowledge achieved, thanks to friendly relationship and high professionalism and competence of AGT staff. We’d be pleased to work with them again in the future.”

“I have just completed an online course with AGT and have to say I was pleasantly surprised at how well it went. As it was the first time I have participated in an online course I did not know what to expect. The instructor proved to be a superb instructor with his knowledge of the aircraft and also his enthusiasm to teach. He always managed to keep me interested in the subject. I would highly recommend any course. Many thanks !”

“We have been very pleased and surprised by the reactivity, flexibility, professionalism and competency levels of AGT. We would definitely recommend them to other MROs and are looking forward to build other tailored training programs matching our requirements.”
